SUMMARY

AI & Machine Learning enthusiast with experience in developing CNN models, data preprocessing, model training, and visualization. Skilled in Python, PyTorch, TensorFlow, and data analysis tools. Strong foundation in software engineering principles and capable of deploying end-to-end AI solutions, from research to production.

WORK EXPERIENCE

Freelance Frontend Developer — Remote

Jan 2023 - Aug 2024

- Built responsive and interactive interfaces.
- Collaborated with teams on real-world projects and code reviews.
- Managed communication with clients to deliver required features.

Researcher & Model Developer — Remote

Oct 2024 - ongoing

- Worked on medical imaging projects and data analysis
- Developed and implemented machine learning / AI models
- Conducted research and experiments to improve model accuracy
- Prepared reports and visualizations of results

Data Analyst, Knots Solutions (Pvt) Ltd – Karachi, Pakistan

Aug 2025 - Sep 2025

- Collected and processed datasets for reporting and decision-making.
- Performed data analysis to extract insights and trends.
- Assisted in creating dashboards and visual reports.
- Improved data accuracy and supported operational processes.
- Provided data-driven recommendations for strategic initiatives.

IT Assistant, Noor Recruiting Agency Islamabad

Sep 2025 - Jan 2026

- Manage and maintain IT systems, networks, and hardware/software for smooth operations.
- Provide technical support and troubleshoot issues for staff and clients.
- Ensure data security, backups, and system updates are properly implemented.
- Communicate with clients and vendors to resolve IT-related concerns efficiently.

EDUCATION

BS Software Engineering — Iqra University, Karachi

Sep 2021 - Sep 2025

Major: Artificial Intelligence, Computer Vision

Final Year Project: Fine-Grained Classification of Ultrasound Fetal Planes

TECHNICAL SKILLS

Programming: Python, Basic C, JavaScript

AI/ML: Pandas, NumPy, Matplotlib, PyTorch.

Frontend: HTML, CSS, React

Tools: Google Colab, Jupyter Notebook, VS Code, Power BI, MS Office

Core Skills:

- Data Cleaning & Preprocessing
- Exploratory Data Analysis (EDA)

Programming: Python, Basic C, Javascript

AI/ML: Pandas, NumPy, Matplotlib, PyTorch.

Frontend: HTML, CSS, React

Tools: Google Colab, Jupyter Notebook, VS Code, Power BI, MS Office

Core Skills:

- Data Cleaning & Preprocessing
- Exploratory Data Analysis (EDA)

ACADEMIC PROJECTS

Fine-Grained Classification of Ultrasound Fetal Planes (Final Year Project)

- Developed a CNN model with SE Blocks & MobileNetV2 using PyTorch.
- Achieved 93.34% validation accuracy on FETAL_PLANES_DB dataset.
- Performed ablation study with 3 model variants.
- Applied Explainable AI techniques (Grad-CAM, Guided Backprop).
- Built a Streamlit app for real-time prediction deployment.

Facial Emotion Detection (Deep Learning Project)

- Fine-tuned EfficientNetB0 on FER-2013 dataset.
- Implemented real-time webcam-based emotion recognition.
- Classified seven basic emotions with multi-class CNN architecture.

Heart Disease Prediction (Machine Learning Project)

- Built classification models using Scikit-learn.
- Compared KNN and Logistic Regression for prediction accuracy.

Text Analyzer (Python Project)

- Developed a Streamlit app for text analysis.
- Demonstrated parsing, string operations, and data type processing.

CPU Scheduling Simulator (OS)

- Simulated scheduling algorithms and optimized wait/turnaround time.

CERTIFICATIONS

- Python for Data Science, AI & Development
- MS Office
- Inpage
- How to write a research paper
- Get started with Jira
- English for Common Interactions in the Workplace

ADDITIONAL INFORMATION

- Activities: Cricket, Swimming
- Soft Skills: Time Management, Independent Work, Team Collaboration
